Learning disabilities (LD) are often called the ‘invisible’ disability, because unlike needing glasses or a wheelchair, you cannot identify a person with LD just by looking at them. There is not a ‘cure’ for LD, but there are proven strategies for students to overcome their learning challenges and become successful in school and in life.

The Pesky Way is the method by which Lee Pesky Learning Center addresses the unique needs of an individual student with a learning challenge. Our method focuses on the needs of the whole person and has proven to be highly effective – with over 90% of our students meeting or exceeding their learning goals each year.

**LEE PESKY LEARNING CENTER**

When parents realize that ‘working harder’ and ‘increasing motivation’ in the classroom and at home is not helping their student overcome their learning challenges, they come to Lee Pesky Learning Center.

**UNDERSTANDING THE NEED**

Every family who comes to the Center has a unique story. We begin by listening to your concerns and learning about what brought you to the Center so we can build a plan of action to address your needs.

**EVALUATION**

For most students, a comprehensive learning evaluation is needed to assess academic skills, self-regulation, and information processing – the learning needs of the whole person.

Our clinical department conducts individual evaluations, analyzes results, and completes a learning profile that informs an intervention plan.

**CREATING A PLAN**

Intervention plans are a ‘plan of action’ to help each student understand and overcome their obstacle(s) to learning.

Individualized plans are designed by LPLC’s clinical and education staff, based on learning profiles, to build on student strengths, while addressing their challenges.

Plans are reviewed with families and together we set goals and develop strategies for achieving those goals.

**INTERVENTION**

Student intervention plans are delivered one-on-one with a Lee Pesky education specialist or counselor. Although needs vary, many students see academic improvement after a program of 70 intervention hours.

We continually monitor each student’s progress, and make adjustments when needed, to ensure every student stays on track to meet their goals.
